DETAILED ACTION

Examiner amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gordon r. Lindeen III on June 9, 2005.

The application has been amended as follow:

In claim 34, line 4, the phrase "the remote terminal and to select one of either beam forming or transmit diversity to be applied to signals transmitted from the base station to the remote terminal using the measured characteristics of the signal received from the remote terminal"; has been replaced with - - "the remote terminal and to select an amount of beam forming and an amount of transmit diversity to be applied to signals transmitted from the base station to the remote terminal using the measured characteristics of the signal received from the remote terminal,

Wherein the processor selects an amount of transmit diversity by applying weighting coefficients to a first transmitted signal and a delayed copy of the first transmitted signal, the amount of transmit diversity being greater as the magnitude of the weights are made more equivalent - -

Claim 35 has been deleted.

Allowable Subject Matter

Art Unit: 2684

2. Claims 1-6, 8-18, 20-28 and 30-34, 37-40, are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, the prior arts fail to teach "setting transmit weights for a first signal and at least one delayed diversity signal copy based on the determining so that the delayed diversity signal copy receives a weight of greater magnitude if the reception is likely to be improved and a weight of lesser magnitude if the reception is not likely to be improved", as cited in the claim.

Regarding independent claims 12, 23, 26, 30 and 34, the prior arts fail to teach "selecting an amount of transmit diversity comprises applying weighting coefficients to a first transmitted signal and a delayed copy of the first transmitted signal, the amount of transmit diversity being greater as the magnitude of the weights are made more equivalent", as cited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
